

LIFT09

Workshop - The future of the Internet of Things

Wednesday, February 25 – Geneva

Hi everyone! Thanks for your interest in the Future of the Internet of Things workshop at LIFT09.

As you might have noticed, it will start a little earlier and end later than the others so that we have time to get loads done! So please, try to be there at 9h30 so we can start right away. Actually we have a limited amount of badges to give away for the attendees, so first come first served. And too bad for the others...

We want to document this workshop as extensively as possible, so we kindly want to ask all of you to take notes, pictures, write blog posts, etc, to link to www.webofthings.com/liftog where we'd like to aggregate everything. On Flickr, please tag your images with [liftogwot](#)

Ideally, by the end of March you'll be able to download a PDF booklet with all the infos, drawings, ideas, tips that have been generated at the workshop. So get your creative juices flowing, we want this to be a milestone workshop.

The workshop will depend on your active participation so we hope you don't plan to stay at the back of the room and take notes, we won't let you :D

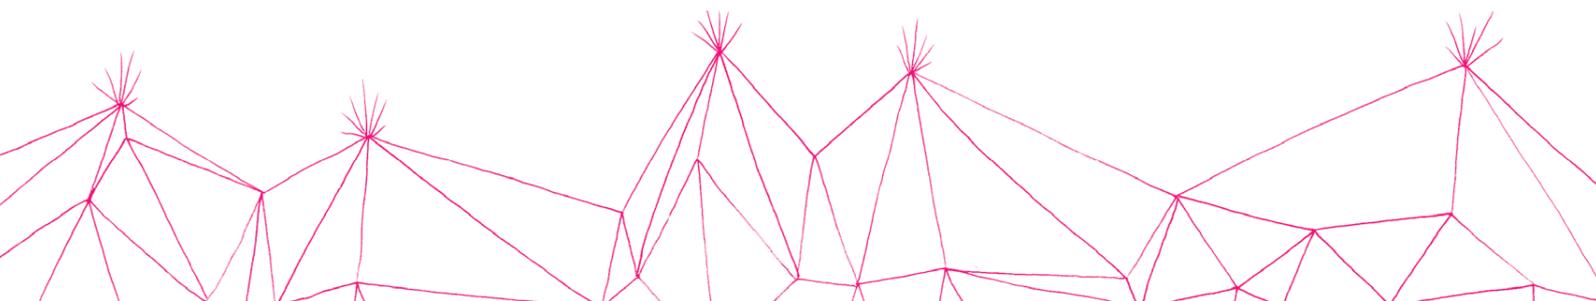

We are building a community of people interested in building the future Internet of Things and we hope this workshop will be a first step in motivating the community, sharing ideas, collaborating through www.webofthings.com. Feel free to share this with everyone!

Looking forward to see you all on Wednesday @ 9h30!

Vlad Trifa - SAP Research / ETH Zurich

Alexandra Deschamps-Sonsino - Tinker.it!

Dominique Guinard - SAP Research / ETH Zurich

PROGRAM

9:30 am

Welcome

9:35 am

Short roundtable. Tell your name, where you come from and work, and **three** keywords/tags that describe you (don't tell anything more). Oh - these shall be the same ones as on your badge.

9:45 am

Short intro about the current status of the internet of things and where it is going to. We'll briefly show some projects and ideas and themes we find cool.

10:15 am

What's next! You get each 6 post-its to write keywords in three fields:

- who (politicians, scientists, elderly,...)
- where (work, home, forest, school,...),
- what (technologies, mobile phones, sensor, alarm clocks, credit cards,...)

At the same time you will form groups of 4 people that will be working together on some specific topics.

10:45 am

Start brainstorming! Forget the problems, and ethical issues. The point is to be daring and adventurous. Draw, write, prepare slides, use any support you want! Take your tablets!

12:00 am

Each group will have max. 5 minutes to present their ideas to the crowd.

12:30 am

Thanks, closing remarks, instructions on how to post stuff
